

## **Agenda item 3.5**

Paragraph 25 of the annotated agenda, Annex 9

# **Draft Procedure for the Article 6.4 mechanism registry**

**Article 6.4 Supervisory Body – Fifteenth meeting**

**Thimphu, Bhutan - 11 to 14 February 2025**

## Updated Sections

---

- Further work needed on implications of post-authorization changes
- Procedural steps for post-issuance authorization and changes to authorization changes, corresponding to ACP
- Editorial changes, including minor structural changes to ensure simple clear language and consistency with ACP and CMA decisions
- MCU identification of whether it can be post-issuance authorized or not (“PI” or “NPI”)
- Added the reversal risk buffer pool accounts
- Moved content from Party document to registry procedure, where appropriate

## Unit Serialization – uniquely identifying information

---

- Common for all A6.4ERs (“equal before God”)
- Immutable throughout the lifetime of an A6.4ER
- Comprises:
  - a) The issuing registry identifier set at “UN01” for all A6.4ERs as they are all issued in the mechanism registry
  - b) The host Party identifier
  - c) The Article 6.4 activity identifier
  - d) The vintage
  - e) The serial number

**UN01 – TH – 876 – 2025 – 245566**

- All other components of A6.4ER identifiers are (formally) mutable and reflect the current status of the specific A6.4ER

## Unit Serialization – MCUs

---

- Adds the “MCU” designation before uniquely identifying information
- Adds a marker confirming the possibility of post-issuance authorization:
  - “PI” to identify that the MCU can be authorized post-issuance;
  - “NPI” to identify that the MCU cannot, or can no longer be, authorized post-issuance.

**MCU – UN01 – TH – 876 – 2025 – 245566 – PI**

**UN01 – TH – 876 – 2025 – 245566 – CA0001 – NIO – C – FT**

**UN01 – TH – 876 – 2025 – 245566 – MCU - PI**

- Adds the “CA0001” designation before uniquely identifying information
- Adds scope(s) of authorization a marker confirming the possibility of post-issuance authorization (“N” for NDC, “I” for IMP, “O” for other purposes
- Adds a marker for further conditionality of authorization (“C”)
- Adds a marker for first-transferred AERs (“FT”)

**CA0001 – UN01 – TH – 876 – 2025 – 245566 – NIO – C – FT**

## Recommendation

---

- The secretariat recommends that the SBM adopt the “Procedure: Article 6.4 mechanism registry” and mandate the secretariat to maintain and update the adopted procedure as necessary to accommodate the functions of the mechanism registry.
