Subject: SBM015 annotated agenda and related annexes - Inputs

Dear Chair of the SBM:

With reference to the Annotated agenda and annexes for the 15th meeting of the supervisory body, I would like to offer the following input.

- From the Work plan of the Methodologies Expert Panel for the year 2025 it is noted that it covers work on revision of CDM Methodologies/Methodological tools/Standards and Guidelines besides requirements for methodologies. The extent of this work is vast and may consume the resources available in the MEP and that from the Secretariat. Besides the above revision work, new submissions for Bottom-up methodologies and methodological tools for consideration of the MEP are also expected to be received. It is important to ensure the speedy implementation of the PACM, which the global project stakeholders are eagerly awaiting over the past few years. In view of this it is suggested that the SBM and Secretariat may engage significant number of resources from the Roster of Methodological Experts.

I hope the Supervisory Body will consider the above input.

Thanks,

Vinay Deodhar
