

## **DAY 2: WORLD CAFÉ**

### **Breakout Group 1: Key Messages**

1. The categories of impact assessments identified include a) job impact assessments b) policy impact assessments c) technology impact assessments d) financial modelling for impact assessment
2. There is a need for an inventory of tools for assessing the categories of impact assessments highlighted in 1) above as a starting point; which would form a platform from which parties can choose nationally appropriate tools.
3. The full scope of tools for data gathering, assessment frameworks, data analytics, and communication and reporting should form part of impact assessment categories in 1) above
4. Technical training and capacity building should build in-country capacity and personnel resourcing to undertake the assessments; this however call for budgetary support rather than project type of funding
5. The Finance Mechanism of the UNFCCC, particularly GEF should provide a clear programme for funding the development and support capacity building for undertaking impact assessments, policy development on RM.
6. In accordance with Article 8 of the Convention, the funding of the Secretariat to deliver on its mandate in relation to response measures need the political will for effective delivery on matters related to RM
