- **2**= Paragraph number
- **3** = Comment the actual feedback or observation, including justification for what needs changing
- **4** = Proposed change suggest the text if possible

A6.4-MEP003-A01 (v.01.0)			
1	2	3	4
Section no.	Para. no.	Comment	Proposed change
			(Include proposed text)
6.1	31	How is "economically viable" defined in the context of BAT, particularly when technologies may be cost-prohibitive for some regions or parties? Should there be clearer criteria for defining economic viability based on local contexts?	NA
6.1	31	What are the data requirements for proving that a particular technology qualifies as the "best available technology"? Is there a standardized data collection process across different sectors and regions? How can technology users validate the BAT status if reliable data is unavailable or inconsistent across regions	NA
NA	NA	How should the methodology adapt to sudden shifts in national or international climate policy, such as new emission targets or incentives, that may significantly alter emissions baselines?	NA
